ABOUT THE INSTITUTION:

Bheemanna Khandre Institute of Technology (formerly Rural Engineering College), Bhalki, is located in Bidar district at the northern tip of Karnataka in India,

established in the year 1982, approved by AICTE New Delhi, affiliated to VTU Belgaum and accredited by NBA. The college has a very magnificent building and good infrastructure featuring about 50,000 sq. m. built-up area, well-equipped laboratories, library having 64,000 books and 60 national journals, 29 international journals in addition to more than 1500 J-GATE, e-subscribed journals (IEEE ASCE, EBSCO, ASME, , McGraw hill, ASTM Digital Library), sports facilities, T & P Cell, NSS, Student welfare office, STEP, EDP Cell, Consultancy cell, EDUSAT, e-vidya learning etc..

ABOUT THE DEPARTMENT:

The department of Mechanical Engineering was established in the year 1982 with the present intake of 180 students with an objective to produce quality technocrats and ensures continuous and qualitative progress. The department has well equipped modern laboratories and well qualified, experienced, dedicated and provoked faculty with industrial and research background. The department has accredited by NBA The department is having various associations like MESSA (Mechanical Engineering Students & Staff Association), Akashya Urja club & E-TIME club which conducts exhibitions, seminars, model building competitions, vocational training courses on CAD/CAM/ CATIA/Ansys/ Master CAM Software, etc. The department has received financial support from AICTE Delhi under MODEROB and Karnataka State Council for Science and Technology (KSCST), Bangalore, for students' projects.

THEME of WORKSHOP:

The Program aims to to generate interest and impart knowledge on the materials aspects of advanced components subjected to challenges in advance processing, Characterization and Design.

WORKSHOP COVERS:

1. To Impart basics concepts of materials in engineering and technology
2. To provide knowledge about processing and characterization of materials
3. To understand the challenges in design of advance material components, and the performance aspect which help in enhancing component life as well as higher efficiency?
4. To impart correlation of microstructure and mechanical properties of advanced materials.
